

# SCIENCE TEACHERS

## Summer Research Fellowships

### 2012-2013

Science teachers from public, private, and parochial K-12 schools in the New York metropolitan area are invited to apply for Summer Research Fellowships at Columbia University. Successful applicants must agree to participate in Columbia's program for two consecutive summers, eight weeks each summer.

You will have a unique opportunity to participate in cutting-edge research in a Columbia University laboratory with University faculty, postdoctoral fellows, and graduate students. Each research fellowship provides a proposed stipend of \$5,000 per summer.

#### Opportunities available:

astronomy, biological sciences, chemistry, earth sciences, engineering, environmental sciences, genetics, materials science, medicine, microbiology, nanotechnology, neuroscience, physics, physiology, toxicology, and other specialties.

You will gain hands-on experience in the practice of science that will better enable you to communicate to your students the excitement of scientific discovery and of being a scientist.

**APPLICATION DEADLINE:**  
**JANUARY 31, 2012**

To submit an application, please visit our Website: [www.ScienceTeacherProgram.org](http://www.ScienceTeacherProgram.org)
